

REMARKS

In this Amendment, Applicant has omitted the previously submitted amendments to the Title and the specification, believing that recitation of the support for the amendments were inherently apparent and believing that the Examiner's specific reference to Claims 1-5, 7-11, 13-21 and 22-41 was an indication that the Examiner is seeking identification of support only for those claims.

At thorough reading of the patent application/disclosure reveals that support for the changes to the claims as well as the new claims is found therethroughout.
